### **CAL FIRE Suspends Burn Permits in Calaveras, Tuolumne, Eastern San Joaquin, and Eastern Stanislaus Counties**

**San Andreas** – After another wet winter and above average snowpack, warming temperatures and winds are quickly drying out the abundant annual grass crop. The increasing fire danger posed by the high volume of dead grass and hotter, drier conditions in the region is prompting CAL FIRE to suspend all burn permits for outdoor residential burning within the State Responsibility Area of Calaveras, Tuolumne, Eastern San Joaquin, and Eastern Stanislaus Counties. This suspension takes effect June 5, 2024 and suspends all residential outdoor burning of landscape debris such as branches and leaves.

“As the weather continues to become hotter and dryer, the lower and mid elevation ranges are entering into conditions that are conducive to the spread of unwanted fires. Residence can continue to work on their defensible space by using alternative methods of disposal such as chipping or disposal of green waste through the resources offered in their specific county,” states Unit Chief Nick Casci.

Since January 1, 2024 CAL FIRE and firefighters across the state have already responded to over 1,253 wildfires. While outdoor burning of landscape debris by homeowners is no longer allowed, CAL FIRE is asking residents to take that extra time to ensure that they are prepared for wildfires by maintaining a minimum of 100 feet of Defensible Space around every home and all buildings on their property and being prepared to evacuate if the time comes.

Here are some tips to help prepare homes and property:

- Clear all dead and/or dying vegetation a minimum of 100 feet around all structures.
- Landscape with fire resistant plants and non-flammable ground cover.
- Find alternative ways to dispose of landscape debris like chipping or hauling it to a biomass energy or green waste facility

The department may issue restricted temporary burning permits if there is an essential reason due to public health and safety. Agriculture, land management, fire training, and other industrial-type burning may proceed if a CAL FIRE official inspects the burn site and issues a special permit.

The suspension of burn permits for residential landscape debris does not apply to campfires within organized campgrounds or on private property. Campfires may be permitted if the campfire is maintained in such a manner as to prevent its spread to the wildland. A campfire permit can be obtained at local fire stations or online at [PreventWildfireCA.org](http://PreventWildfireCA.org).

For additional information on how to create Defensible Space, on how to be prepared for wildfires, as well as tips to prevent wildfires, visit [www.ReadyForWildfire.org](http://www.ReadyForWildfire.org).
